PROJECTS

DesignPro

Develop and Design

DesignPro is a browser-based tool that helps users easily create and manage software and data-modeling diagrams such as Use Case, Class, and ER diagrams. It provides features like autosave, exporting, sharing, and real-time collaboration with chat. The system is developed using .NET 8, ASP.NET Core Minimal APIs, Blazor WebAssembly, EF Core with SQL Server, and SignalR, ensuring efficient performance and rea

Endless Runner Game using Unity

Develop and Design

Endless Runner is a single player three dimensional runner built to test the fundamentalsof game design and programming. The player controls a runner from an over the shoulderperspective and must navigate a linear course while avoiding obstacles and collectingcoins.
